

Da Vinci Diamonds Dual Play

Introduction

Da Vinci Diamonds Dual Play provides double the *Tumbling Reels* action and double the fun of our original mega-hit game, **Da Vinci Diamonds**.

Play two *Tumbling Reels* games at the same time and enjoy the additional win opportunities of the powerful *Tumble Thru* feature. Symbols from the top game tumble down to replace symbols in the bottom game, leading to even more wins. You can win again and again on a single play of the game!

Three Bonus symbols on a payline trigger the **Extra Paylines Free Spins Bonus** with six initial free spins. You are granted 20 additional paylines for the duration of the Bonus, giving you 60 ways to win on each free spin.

Take a trip back to the glory of the Renaissance, and maybe you, too, can enjoy the wealth and splendor of a Medici.

Tumbling Reels and Tumble Thru Feature

All payable-defined symbol combinations trigger the *Tumbling Reels* feature during regular play and **Extra Paylines Free Spins Bonus** play. All winning symbol combinations are evaluated and win values are added to the win meter.

All symbols in winning combinations disappear. The empty symbol positions on each reel are filled as symbols tumble from above, in sequence. With the *Tumble Thru* feature, symbols from the top game tumble down to fill empty spaces in the bottom game during regular play. The game screen is re-evaluated for symbols in winning combinations and values are added to the win meter.

The *Tumbling Reels* feature remains active until no payable-defined symbol combinations are created as a result of new symbols tumbling from above.

Extra Paylines Free Spins Bonus

Trigger the **Extra Paylines Free Spins Bonus** by getting three Bonus symbols on a payline.

Triggering the **Extra Paylines Free Spins Bonus** awards you six initial free spins. The Bonus offers you 20 more ways to win with 20 extra paylines that crisscross between the top and bottom games. Also, additional Wild symbols have been added to the bonus reels, making them extra rich. With so many paylines and extra Wild symbols, you are much more likely to reap the rewards of the *Tumbling Reels* feature.

Retrigger the **Extra Paylines Free Spins Bonus** and earn six additional free spins by getting three Bonus symbols on any of the 60 paylines (up to a maximum of 300 free spins per Bonus).

Your line bet in the Bonus is equal to the line bet on the spin that triggered the Bonus.

Rules

Misuse or malfunction voids all pays and plays.

All line win symbols must appear on a payline and on consecutive reels, beginning with the far left reel.

Payline configurations are displayed in the paytable. There are 40 active paylines in the main game and 60 active paylines in the **Extra Paylines Free Spins Bonus** game.

Only highest winner paid on each payline.

Only one win paid per payline.

Line wins are multiplied by the line bet.

Coinciding wins on different paylines are added.

Wins are shown in currency.

Regardless of your bet size, there is an award cap on any single transaction. See the payable for details. A transaction includes the results of the **Extra Paylines Free Spins Bonus** plus the outcome that launched the Bonus. If the award cap is reached in the Bonus, the Bonus may end early before all tumbles and/or before all free spins have been completed.

Additional Information

Expected Payback

In accordance with fair gaming practices required in most legal jurisdictions worldwide, each and every game outcome is completely independent. The odds of getting any particular outcome are always the same.

The odds do not vary based on prior outcomes, bet size, balance size, time of day, day of week, etc. For example, if the top award is won on a given play of the game, the chances of winning the top award on the next play are exactly the same. Likewise, prior losses do not change future odds.

The expected payback reflects the theoretical return across a very large number of plays by numerous players over an extended period of time. For this game type, the long-term theoretically expected payback is 93.41%. The results for any given player over a play session can vary widely from this long-term, expected average in either direction. The fewer the number of games played, the wider the normal variance of actual payback that may be experienced.
