

OBJECT OF THE GAME

Obtain a reaction of five hexagons of the same colour on a Win Line or at least three consecutive identical icons from left to right on a Win Line, starting from the extreme left.

BETTING LIMITS

Minimum bet per line: **1¢**

Maximum bet per line: **\$1**

HOW TO BET

Choose the amount of your initial bet (stake) per line. Since all 20 Win Lines are active in each game, the amount of your bet (stake) per line will be automatically multiplied by 20 and appear in the **TOTAL STAKE** box. Click on the + arrow to increase your bet or on the – arrow to lower your bet, until you have reached the desired amount, staying within the indicated minimum and maximum limits.

HOW TO PLAY

The game dashboard shows a total of 18 hexagons of three different colours. Each hexagon contains one of 9 possible icons. Click on the **PLAY** button to spin the hexagons. The amount of your total bet is then deducted from your balance. In order to win, you need to obtain:

- **A Win Line:** at least three consecutive identical icons that appear from left to right on a Win Line, starting from the extreme left of this Win Line, regardless of the colour of the hexagons.

OR

- **A Reaction:** five hexagons of the same colour (yellow, blue or red) on a Win Line, regardless of the icons in them. The hexagons explode and are randomly replaced by new hexagons that may make new colours or icons combinations.

The new arrangement of hexagons may create new Reactions or Win Lines.

The game ends when you do not obtain either a Reaction or a Win Line.

To see the potential Win Lines, click on any of the numbers from 1 to 20 located on each side of your game dashboard.

PAYOUTS

Win Lines

Payouts vary according to the icon shown on the Win Line and the number of identical icons shown on the Win Line, in accordance with the following payouts:

 5 x 1,000 4 x 100 3 x 60	 5 x 800 4 x 90 3 x 50
 5 x 700 4 x 80 3 x 45	 5 x 500 4 x 70 3 x 40
 5 x 200 4 x 60 3 x 35	 5 x 150 4 x 50 3 x 30
 5 x 100 4 x 35 3 x 20	 5 x 50 4 x 30 3 x 16

A Win Line consists of 3, 4 or 5 consecutive identical icons from left to right, starting from the extreme left of the Win Line. The payouts multiply the amount of your bet per line. For example:

Five  on a Win Line pays 50 X your bet per line. In this case, a bet per line of 5¢ pays \$2.50. Only the highest prize on each Win Line is paid.

Reaction

Each Reaction:

- **Pays double your bet per line.** For example, if you obtain a Reaction, a bet per line of 5¢ pays 10¢;
- AND
- **Increases the Win Line Multiplier by 1 unit.** Each Reaction increases the Win Line Multiplier by 1 unit. Winnings corresponding to any Win Line **following** a Reaction are multiplied by that Multiplier. If you obtain other Reactions, the same rules apply.

NOTE : All winnings are paid into your Espacejeux account.

PROGRESSIVE JACKPOTS

A progressive jackpot is a prize that increases with each eligible bet made by players in Cashdrop Real Play games, until it is won, at which point it begins again at its minimum amount (see below).

A minimum bet per line (stake) of 1¢ is required to become eligible for progressive jackpots, which are won only when the  icon appears anywhere on the dashboard during a game. The Multiplier does not apply to payouts on progressive jackpots.

In order to win the **Mini** progressive jackpot (minimum amount of \$10), three  icons must be displayed on the game dashboard.

In order to win the **Midi** progressive jackpot (minimum amount of \$400), four  icons must be displayed on the game dashboard.

In order to win the **Maxi** progressive jackpot (minimum amount of \$12,000), five  icons must be displayed on the game dashboard.

If your bet per line is equal to or higher than the minimum bet per line required to become eligible for the Mini, Midi or Maxi progressive jackpots (1¢ per line), 3% of the bet is collected and added to the progressive jackpots, at the rate of 1% per progressive jackpot (Mini, Midi and Maxi).

If more than one player claims the same progressive jackpot, the prize is awarded to the player that is first as measured by the server clock. The other players will win the initial amount of that progressive jackpot.

Progressive jackpot payments are added to all other payments for one or more Win Lines or Reactions.

NEW GAME

Click on the + or – arrow at the end of a game to change the amount of your bet for the next game.

Click on **PLAY** to start a new game.

RETURN TO PLAYERS

The theoretical Return to Players is **95.16%**.
